ASLEEP

Brand

Concept

People with busy lives
Stressful daily life.
Work, relationships, surroundings. There are many causes of stress

In our personal time, we can take a break from such everyday worries,
It is meaningful for intelligent people living in the present to think about the
future of the planet.

Or people who wish to live richer days.
Real wealth comes from a healthy mind and body parity,
and a sense of care for others and for the future.

The vine is like being in a hotel room by the lake.
Time spent with loved ones on the bed.
Healthy sleep, comfort and a healthy turnover guarantee a more fulfilling
tomorrow.
This is made possible by the ASLEEP bed with built-in Fine Revo.

The pursuit of the feeling of sleeping on the water, more in the middle of life.

SLEEP on the AQUA In other words, it's ASLEEP.
Healthy sleep is the source of daily vitality.

And consideration for the future environment.

Holistic and healthy living starts with ASLEEP release & change.

A bed that is kind to me tomorrow and to the future of the planet.

Mattress icons

ASLEEP with Fine Revo®

We want you to feel "good" when you wake up in the morning.
To achieve this, it is important to sleep deeply without disturbing the rhythm of sleep.

The keywords are "easy to turn over"
and "no long-lasting shaking".
and "the shaking does not last long".

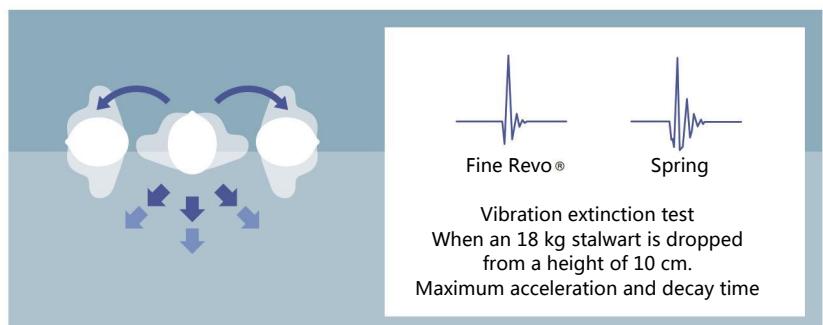

Fine Revo® is a unique material that moves flexibly in three dimensions compared to conventional springs, which mainly move in the rift direction,

Fine Revo® is the only material that can move flexibly in three dimensions, and it adapts to various movements of the body during sleep, and also supports turning over.

Key to maintaining a sleep rhythm for deep sleep.

- 01 Easy to turn over in bed
- 02 Excellent Shake-absorbing and damping properties
- 03 High body pressure dispersion
- 04 No strain on the sleeping posture.

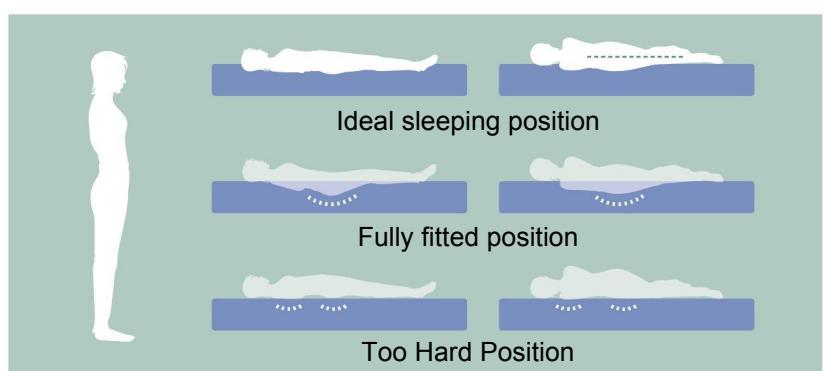

Easy to turn over
Fine Revo "can be turned over with less strain on the neck and chest muscles than springs or low-resilience urethane. Fine Revo "supports natural tossing and turning without disturbing sleep.

Excellent vibration damping properties
Various body movements during sleep cause "shaking" of the mattress. The term "vibration damping" refers to the fact that this unpleasant shaking does not continue and subsides quickly, and Fine Revo Re has excellent vibration damping properties.

Excellent pressure dispersion
When the body comes into contact with the bed, pressure is exerted on both sides. By evenly dispersing the pressure on the body side, an environment is created that does not disturb blood circulation while sleeping. The mattress supports the body's uneven surfaces with even repulsive force and without any bumps.

No pressure on the sleeping posture.
Fine Revo Ya sinks under light loads, while heavy loads increase the repulsive force by overlapping each other. When a person sleeps, the back is softly sunk and the hips are firmly supported.

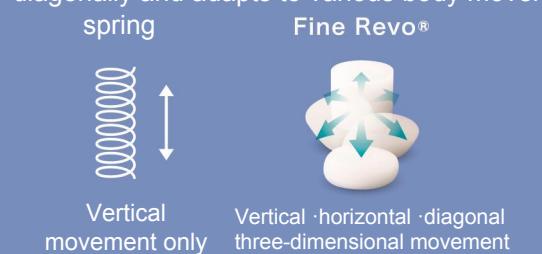

The one and only material that is 3-dimensionally flexible and environmentally friendly

Three-dimensionally flexible deformable material

「Fine Revo®」

For deep sleep, REM and non-REM sleep rhythms are not disturbed, The bedding supports the body's various movements without disturbing the REM and non-REM sleep rhythms. The ASLEEP material FINE REVO ® has extremely flexible and stretchable properties, It supports the body in three dimensional flexible movements. It can be deformed up and down, back and forth, side to side and diagonally and adapts to various body movements.

Fine Revo ® was developed with a completely different concept to the springs used in many conventional beds, in order to achieve a "sleeping comfort like sleeping on water".

*Investigated by the Company. Depends on the operating environment. Another key feature of this product is that it is environmentally and human health friendly.

Environmentally friendly Fine Revo®
Developed not only for its outstanding functionality, but also for its contribution to improving global environmental issues, Fine Revo® is a recyclable material that aims to reduce waste and make better use of resources. No hazardous substances leach out in the landfill environment. As a non-spring mattress, easy to separate and dispose of.

Fine Revo®
material Fine Revo® is a composite of resin, which is also used in food storage containers and dialysis tubing, and oil, which is used in lipstick and other products.

Comfortable both on the side and on the back.
Fine Revo and urethane provide surface support for the lumbar area, which is subject to heavy loads, to maintain a firm sleeping posture.

Stable sleeping comfort with minimal swaying.
Fine Revo is embedded in the urethane, making it ideal for side sleeping.

Shaking More → Less
Vibration Decay time comparison

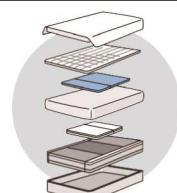

FINE REVO, a 30-year durable material.

Responding to your "I want to use it for a long time" needs.

Fine Revo mattresses can be replaced part by part. If your sleeping preferences change, or if the cover gets dirty, for example, You can change the parts and use it for a longer period of time.

※In a durability evaluation test, the cushion material Fine Revo® mattress was subjected to 480,000 repetitive load cycles (30 years of use: more than the US standard) without dimensional change.

All mattresses are equipped with Fine Revo.

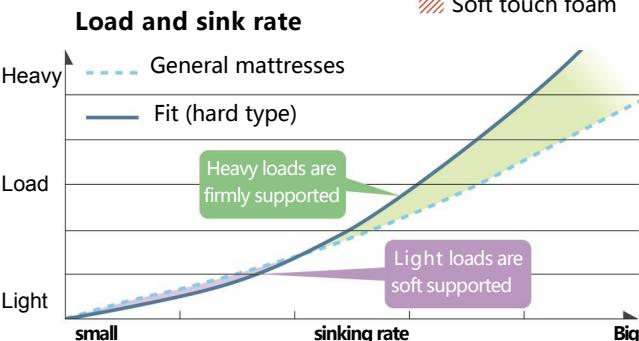

Cleaner and fluffier. Choice of mattress covers

Fit Soft and fluffy

For those who prefer a soft touch.

In each mattress footprint type,

High-density, soft, soft-touch foam in the overcover.

Soft but firm.

Provides a quality sleeping environment that wraps around you. The "Fine Revo" provides firm body support and helps you to turn over in bed.

Blissful touch.

The surface is made of knitted fabric and jump-quilt. The pinched quilt pattern increases the fluffiness.

ASLEEP with Fine Revo® Function survey

Fine Revo embedded type

Fine Revo is individually embedded in the urethane to provide superior vibration damping.

Fine Revo Vertical Pillar Type

Fine Revo is independent of the urethane to provide more firm support for turning over.

Fine Revo 8 mm

In the Fine Revo embedded type, the Fine Revo is extended 8 mm above the urethane for a more supportive feel.

FINE REVO 5 mm

In FINE LEVO embedded systems, the Fine Revo is 5 mm above the urethane.

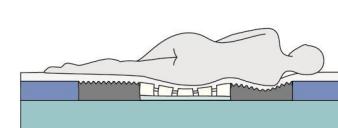

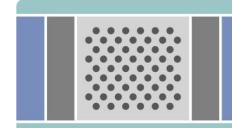

Choice of support layer

You can choose the firmness of the support layer inside the mattress to customise the sleeping comfort to your liking.

Fine Revo lumbar

Fine Revo is placed in the lumbar region to support natural turning over.

Sun-drying OK.

The cover can be removed and dried in the sun. This helps to remove moisture and keep the unit clean and comfortable. See page 23 for maintenance instructions.

Washable

The cover can be removed and washed in cold water in a laundrette or in a household washing machine. See p. 21 for maintenance instructions.

Kapernit fabric

A high-density, soft, soft-touch cover for those who prefer a softer texture. The pinched quilt pattern gives a fluffy feel.

Memory foam

Memory foam (low-resilience urethane) is used in the cover for a snug, enveloping fit.

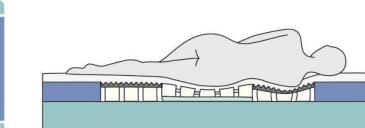

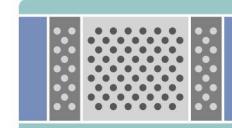

Changeable type

The firmness can be changed freely.

Fine Revo shoulder to foot

Fine Revo is placed in the shoulder to foot area to support natural turning while reducing the burden on the neck, shoulders and lower back.

Fine Revo supports firm turning over!
Top-of-the-range model with overwhelming volume!

Can be changed to the desired hardness.
Equipped with reversible base!

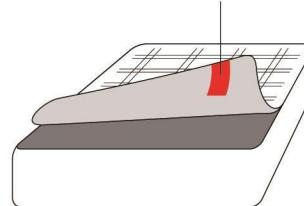

Recommended
washing for the
outside
once / Year

Sun-dried - washable mattresses in water.

Covers can be washed in water in a dry-cleaning, laundrette or household washing machine.

target model Sun dry • washable W-R1, JP, R3, mattress, JX

Attention here!

Caution ! Some washing machines cannot wash "wadded" products.

Always check the label on the unit before washing.

Sun-dry - wash in cold water function Mattresses with washable coverings have a padding weight of 0.9-2.4 kg and a 100% polyester padding. Please check the instruction manual of your washing machine as there may be restrictions on the weight of the padding.

Main conditions for washable washing machines

The machine must not exceed the padding weight limit of the washing machine.

Use a dedicated net-cap *Cannot be dried in a washer-dryer. *Cannot be used with a futon dryer.

It can be removed and ventilated!

Easily removable by zipper.

Wash in cold water and the dirt is removed!

It is also effective in removing dust mites and bacteria. Even if washed in water, dry naturally.
*Make sure to use the special net-keypad.

Sun-dried, fluffy!

*Do not squeeze by hand. Do not tumble dry either.

To use your mattress comfortably

To use your mattress comfortably, please maintain it regularly.

◆ Ventilate the room to remove moisture from the mattress.

◆ Use of futon dryers

JP (Normal), JX (Normal), Gran ET

Use a duvet dryer with the flex bag removed from the mattress.

Comfort -ET, Comfort -PT, JP (fitted), R1, R3 (fitted).

JP and R3 covers 'Fit' are not washable. Comfort ET, Comfort PT and R1 cannot be used in a futon dryer as the huain levot cannot be removed.

◆ Use of heating appliances

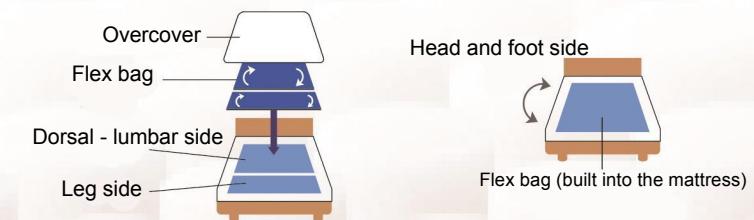

When using electric blankets, electric warmers, hot-water heating pads or other heat-generating heating appliances on the mattress, the operating temperature should always be set to a temperature lower than body temperature. If used at high temperatures, the function of the mattress may be impaired.

Flex bag with built-in Fine Revo.

target model JP, JX, Gran ET

Sleeping comfort remains virtually unchanged for about 10 years if the flexbag is regularly reoriented.

※Depends on the operating environment. The warranty period for the fine revo mattress is 2 years.

Changing the orientation of the flex bag
※ Once every 3 months

Reorienting the mattress
※ Once a month as a rule of thumb

Commitment to health and the environment

We will continue to manufacture with the health of the user in mind.

We are committed to using materials with low formaldehyde and materials with low total toxic organic compound (TVOC) emissions.

Our mission is to provide health and comfort.

The materials used for the frames are carefully selected in consideration of sick building syndrome and chemical sensitivity.

Formaldehyde and TVOC are contained in wood materials, adhesives and paints used in furniture and building materials,

ASLEEP uses materials with low emission of these chemicals.

- Wood materials such as MDF and LVL, adhesives and paints are made of F★★★★ grade products, the highest grade in the Japanese Industrial Standards (JIS) environmental standards.
- Use products that meet Chinese GB standards (Chinese national standards), which are stricter than Japanese JIS standards.

The development continues to contribute to the improvement of global environmental problems and the sustainable development of industry.

The bed frame is made of OPT active board made by Panasonic.

ASLEEP participated in the business verification of Panasonic's OPT utilising boards, ASLEEP will gradually adopt these boards in its bed frames.

This is a 'sustainable board' that utilises waste oil palm wood,

The boards were developed under the following initiatives

- Old oil palm wood waste that has been left in plantations after the harvesting season is converted into fibreboard.

*Deterring deforestation by using abandoned oil palm as an alternative material for wood resources that have been a cause of methane gas and other greenhouse gas emissions.

· Creating local business opportunities and employment while resolving the environmental problems faced by the palm oil industry.

· Contributing to the reduction of CO₂ emissions through the procurement, manufacturing and transport value chains involved in board production.

History of Asleep

Born from the technology and thoughts of the Toyota Group and run by Daichi Corporation to the world.

1966

1966 Aisin Seiki launches the bed business Toyota Bed.
The company aims to provide "high-quality sleep" by adapting Western-style bed furniture to the Japanese lifestyle, using the world's highest-level technology cultivated through the manufacture of automobile parts.

- Split sofa beds are launched.

1970

Resin, which had been a strong point in the manufacture of automobile parts, is also used in beds, and a series of well-designed frames are launched.
Groundbreaking and attracted attention in contrast to the wooden frames that were mainstream at the time.

1990

● 『System 8』 headboard fitted with radio-clock. (1971)
● 『FD801R』 the first in the industry to incorporate a banner type, giving it a stylish design. Received Good Design Award (1976).
● 『Meloping Cavi』 hotel-type bed with authentic natural wood cabinetry and dapple cushions, aimed at high-priced customers. Good Design Award (1983) 『Berlo II』 a bed with a mattress frame, a revolutionary design at the time. Good Design Award (1987)

In the pursuit of 『sleeping comfort』 the company develops technologies and systems that go beyond conventional springs.

- 『Paris Femme mattresses』 allow users to choose their preferred sleeping comfort. (1978)
- First independent spring system in the 『Healthy Support Mattress』 .
- The spring is placed inside the polyurethane block to improve body conformity and damping performance. (1983)

1991

Developed mattresses using gel instead of springs.
『Aqua Healthy Mattress』 gel mattress.
It has liquid-specific sleeping comfort and pressure dispersion properties, yet is easy to transport and has minimal shaking. (1995)

1991

A new brand, Asleep, is launched within Toyota Bed.
『The concept is "living life and health』 .

New bed 『asleep series』 developed based on the concept of health.

- 『Asleep Series』 Low-formaldehyde wooden frames and gel mattresses to combat sick building syndrome. Asleep 150 and Asleep 250 awarded Good Design Award (1995).

Development of various frames for living life.

- 『BELL0001』 awarded Good Design Award (2000).
- Good Design Award for 『ZONANOTTE001』 (2002)
- Good Design Award for 『ZONANOTTE002』 (2002)

2003

Meet Fine Revo®

Unique new material, a resin elastic body that is neither spring nor gel.

FINE REVO Developed a mattress with a structure that provides excellent pressure dispersion and easy support for the turning required for healthy sleep.
Mattresses with 『Super Fitless Mattress』 Fine Revo.(2003)

2006

ASLEEP, a total bedroom space production brand, is launched.

The aim is to propose a bedroom space that pursues a high quality sleep and gives vitality to tomorrow.

- 『Aubergues』 won the Good Design Award (2007).
- 『ZONANOTTE TESSUTE SE』 and 『ZONANOTTE TESSUTE CO』 won the Good Design Award(2008).
- 『ZONANOTTE Tessuto GO』 won the Good Design Award (2011).
- 『The J Concept Mattress Series』 is a mattress that can be washed in water and dried in the sun, based on the Japanese custom of drying futons. Maintains a naturally dry, fluffy and clean bed environment. J-Concept Mattress won the Good Design Award (2009).

2019

Daichi Corporation acquires the ASLEEP business.

Production facilities transferred to Daichi Corporation from end-December 2019,
Production and sales of some products will start in April 2020, with changes to specifications,
A new ASLEEP history begins.
The company has inherited the philosophy of a bed that provides a high quality sleep,
Highly functional and stylish mattresses and bed frames are manufactured and marketed at domestic and overseas factories.

2021

Rebranded as ASLEEP with Fine Revo®.

Supporting 『quality sleep』 backed by research.
With mattresses made of Fine Revos,
A wide range of frames in various variations to add colour to your lifestyle are now on sale.

Providing quality sleep and sophisticated design while constantly thinking about the SDGs theme of sustainable development.

We want to make the time spent in bed more comfortable and enriching while building sustainable relationships with the global environment and the people who use - and are involved in - the production and disposal.

This is our wish at Daichi Corporation.

We will continue to manufacture in consideration of the global environment so that the time spent with ASLEEP will make your life more meaningful.

Commitment to the SDGs

We at Daichi Corporation, in the process of producing ASLEEP, are actively working to contribute to the global environment in support of the SDGs.

3 Strengthen the capacity of all countries, especially developing countries, for national - global health hazard factor early warning, hazard factor mitigation and hazard factor management.

12 As a lifecycle company with a project to collaborate with other companies that transcend industry boundaries and utilise our strengths, we will promote initiatives to resolve various issues.

- By 2020, in accordance with an agreed international framework, to achieve environmentally appropriate management of chemicals and all wastes throughout the product life cycle and to minimise the adverse effects of chemicals and wastes on human health and the environment, air, water, significantly reduce releases to soil.
- By 2030, significantly reduce waste generation through prevention and reduction, recycling and reuse.
- Promote the development of products using recycled and environmentally friendly materials.

17 for sustainable development, complemented by multi-stakeholder partnerships that mobilise and share knowledge, expertise, technology and financial resources to support the achievement of sustainable development goals in all countries, especially in developing countries. Royal - strengthen partnerships.

To meet the needs of our customers.

We import and wholesale sofas, dining rooms, beds and other interior products and sundries.

We manufacture furniture for hotels and inns in our own factories and deliver it locally.

Fine Revo® world expands to become a 'Life Cycle Brand'

Fine Revo®, which is environmentally friendly and has many excellent functions, is being used to expand its applications from mattresses and pillows to sofas, chair seats and other interior applications, to health and welfare equipment and sports-related equipment such as prosthetic arms and legs. The applications are being expanded to sports-related equipment such as health and nursing care equipment and artificial limbs.

FINE REVO® continues to evolve from a bed material to a 'lifecycle brand'.
